80 Amp	<input type="checkbox"/>	1 Phase	<input type="checkbox"/>	3 Phase	<input type="checkbox"/>

The table below indicates at what consumption level the different domestic capacity tariffs will break even or be cheaper with the current single energy rate tariff after price increase and these capacities are recommended.

Average Monthly Electricity Usage (kWh/m)	Break-even capacity
≤ 400 kWh/m	20 Amps
>400, ≤ 600 kWh/m	30 Amps
> 600, ≤ 800 kWh/m	40 Amps
> 800, ≤ 1000 kWh/m	50 Amps
> 1000, ≤ 1200 kWh/m	60 Amps
> 1200 kWh/m	60 + 10 Amps per 200 kWh/m

If you are satisfied with the recommended levels or don't make your selection, these capacities will be applied based on your historic consumption.
