

## NDLAMBE MUNICIPALITY

## WATER SERVICES NOTICE

### PORT ALFRED

This notice serves to inform all Port Alfred residents that the 1.3ML Main Reservoir located at the Port Alfred Water Treatment Works will be scoured on Thursday 16 January 2025. This scouring is part of our scheduled reservoir maintenance activities. This procedure is essential to remove accumulated sediment and ensure the continued provision of clean and safe drinking water.

To minimise disruptions, all service reservoirs have been filled in advance. We anticipate minimal interruptions to the water supply during this maintenance activity. However, residents in higher-lying areas may experience low water pressure during the process.

We apologise for any inconvenience this necessary maintenance may cause and thank you for your understanding and cooperation.
